The American Autowire Difference...

American Autowire manufactures the highest quality OEM replacement wiring harnesses and complete upgraded electrical systems for original restoration, performance enhanced, and custom automobiles. Our dedicated team and their passion for cars, ensures customers will receive the right product to meet their needs. Whether a builder, dealer or enthusiast, our extensive line of American built products, expert team, and superb technical and customer support, make wiring THAT easy!

Our core values:

Customer Focus

We are dedicated to exceeding the expectations of our customers. Our daily actions are performed with the customer in mind, and we strive to continuously improve our products and ourselves. We prize innovation, and consider the end user with each new addition to our catalog.

Effective Communication

We willingly share clear, accurate information. This means addressing customer concerns, while working to find the best solution within the parts we build.

Integrity

Integrity begins with reliability. It is reinforced with honest communication, consistency in words and actions, and a willingness to accept responsibility for every item that leaves our facility.

Leadership

Every American Autowire employee demonstrates leadership qualities by promoting teamwork and seeking new solutions. We treat each other, and our customers with fairness and respect.

Safety

Safety is part of everything we do. We manufacture high-quality products in an environment where employee well-being is priority number one. Every part we manufacture must pass a thorough inspection in order to ensure trouble-free service.

Strategic Thinking

We align and prioritize our daily tasks to support American Autowire's achievement of its long-term goals. We passionately strive to see beyond the present, and look for new ways to improve.

Technical Excellence

We strive to be experts in all aspects of our field, and to be a 'go to' resource for others in our areas of proficiency.

Quality Dedication

We are passionately committed to providing superior products, utilizing our customer feedback, and producing only the highest quality work.

We proudly produce our products right here in the USA at our facility in Bellmawr, NJ!

American Autowire is a veteran-owned company.

PLUG-N-PLAY...

...AND BE ON YOUR WAY!

A Plug-n-Play Experience:

Wiring harnesses & accessories installed as direct replacements to the original factory wiring – **no guesswork.**

That's what American Autowire offers through the Factory Fit® product line. All Factory Fit® reproduction wiring harnesses are made exactly to original General Motors factory standards, using OEM blueprints and GM parts. This type of wiring requires less labor time and electrical knowledge on the part of the installer. Harnesses install exactly as the originals did. You only need to know the specifics of your vehicle to accurately order the correct harnesses (for example: year, make, model, engine, transmission, air conditioning, console gauges, etc.). No terminating or crimping necessary. You can be sure you'll get a perfect fit – a Factory Fit®!

Every Factory Fit® wiring harness is recreated to original GM specifications

GM fuse boxes with original style glass fuses used on every harness

70+ OEM switches available

Many engine and front light harnesses can be modified for an internally regulated alternator or HEI. These options allow owners to maintain an original appearance while modifying the harness for their specific needs. Factory Fit® harnesses are what you want if you are looking for show quality original

harnesses. American Autowire offers a free online OEM wiring quote tool at shop.americanautowire.com. Find all the restoration parts and prices available to your specific year/make/model vehicle! Factory Fit® catalogs can also be downloaded for each GM model at www.americanautowire.com

American Autowire also offers complete modified restoration kits for specific year/make/model vehicles in the Classic Update Series

We Make Wiring THAT Easy!

Our most POWERFUL and VERSATILE wiring systems

The Highway Series was developed to handle the most demanding power requirements and accessories. With the Highway Series, you have the most flexibility in fuse box placement, and the freedom to customize your vehicle however you like. Each wiring system comes with complete, easy to understand instructions to guide you through every step. Steps are divided into individual labeled bags, each containing everything you need to complete the step, keeping you organized and getting you on the road faster.

Pre-Engineered for Power and Customization!

- Developed to handle the most demanding power requirements and accessories
- Enhanced 6 gauge buss bars give you an additional level of quality
- Non-Conductive G-10 body and backplate prevent accidental shorting or grounding from fuses or loose connections
- Longer coils of wire provide greater flexibility in placing the fuse box where YOU want it
- Superior total system protection with our 175 amp Megafuse kit
- Screwdown locking system gives you a scientifically proven vibration proof connection

A IGNITION/STARTER  Connecting the first bag will reward you with a fully connected ignition system allowing you to start your engine. No other device will have been connected but you're definitely off to a great start.	IGNITION SWITCH ADAPTER GM COLUMN  IGNITION SWITCH After connecting Bag B, your vehicle will recharge its battery, so hopefully you haven't left it running for a while...	B ALTERNATOR  After connecting Bag B, your vehicle will recharge its battery, so hopefully you haven't left it running for a while...
MEGAFUSE KIT The MegaFuse Kit will protect your investment with its 175 Amp fuse. INLINE DIODE KIT The Inline Diode Kit will prevent feedback from the Alternator circuit.	C HEADLIGHTS  Connecting the C bag will reward you with the ability to see in the dark - at least with your vehicle's headlights!	HEADLIGHT SWITCH  DIMMER SWITCH
D TURN SIGNALS  Once you have finished Bag D, you can operate your turn signal lights.	E GAUGE PANEL  Bag E completes your dash gauge connections for your speedometer and other instrumentation.	F ACCESSORIES  Bag F is for Finished as you connect your accessories and various final components and you're done!

• Step by Step Process • Each Bag Completes a Step of the Project

Fuse panel dimensions are 4.5" L x 4.5" W x 3.5" H

510825

The Highway 15 Plus is the perfect choice for tight spots in kit cars, roadsters and coupes. Introduced in 2003 as the Highway 15, we've updated the original design with a number of improvements. Our goal with the changes in the Highway 15 Plus is to preserve the same feel as the original, with some modernization and ease of use improvements for both backyard and professional builders.

Features include:

- 1 A built-in LED flasher to support LED or incandescent turn signals without the need to purchase an additional item.
- 2 Our high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides fuse protection for the panel and charging system. Kit utilizes 6 gauge wire and two 175 amp mega fuses.
- 3 Extra connectors and wiring to more easily support a 4-headlight system without an additional add-on purchase, and back up light feed and power wires make the harness easier to install in a more modern vehicle.
- 4 Gauge cluster disconnect wiring allows instrument cluster wiring to be built outside of the vehicle.
- 5 Ignition switch with mating connector and 3 additional accessory and ignition terminals. Uses a square GM style key.
- 6 Headlight switch and floor dimmer switch.
- 7 GM style steering column connection. Male connector and terminals are included to allow for easy adaptation of most stock or aftermarket columns.
- 8 G-10 composite panel base and nylon 6/6 panel components with self-locking screw clamp interface.
- 9 GM color-coded GXL wire with easy-to-read labeling every 3 to 4 inches.
- 10 Full-color, tabloid-sized, step-by-step instructions. (not pictured.)

Highway 22 Plus

\$619⁰⁰

Fuse Panel Dimensions are 7.5" L x 4.5" W x 3.125" H

510760

The Highway 22+ is the flagship universal system for wiring high-tech, high-end custom vehicles. Introduced in 2003 as the Highway 22, we've updated the original design with a number of improvements. Our goal with the changes in the Highway 22+ is to preserve the same feel as the original, with some modernization and ease of use improvements for both backyard and professional builders.

Features include:

- 1 Built-in LED flasher to support LED or incandescent turn signals without the need to purchase an additional item.
- 2 Pre-installed 20 amp relay can now be easily changed to function as either a keyed 12 volt or ground triggered item. A 40 amp relay is also included for higher demand items.
- 3 Our high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides fuse protection for the panel and charging system. Kit utilizes 6 gauge wire and two 175 amp mega fuses.
- 4 Gauge cluster disconnect wiring allows instrument cluster wiring to be built outside of the vehicle.
- 5 G-10 composite panel base and nylon 6/6 panel components with self-locking screw clamp interface.
- 6 Battery and accessory power expansion via heavy duty power studs on the panel.
- 7 Ignition switch with mating connector and 3 additional accessory and ignition terminals. Uses a square GM style key.
- 8 Newly added backup light feed and power wires make make the harness easier to install in a more modern vehicle.
- 9 GM style steering column connection. Male connector and terminals are included to allow for easy adaptation of most stock or aftermarket columns.
- 10 GM color-coded GXL wire with easy-to-read labeling every 3 to 4 inches.
- 11 Full-color, tabloid-sized, step-by-step instructions. (not pictured.)

Highway 15 Plus Nostalgia

\$1,659⁰⁰

Fuse panel dimensions are 4.5"L x 4.5"W x 3.5"H

500944

The Highway 15 Nostalgia is the retro version of our popular 15 circuit universal kit. It packs the same features as the standard Highway 15, but includes 50's inspired braid and lacquer coated wire. We still use our standard high temperature GXL wiring underneath, but the high gloss finish and textured wires are the perfect touch to finish a period correct hot rod.

The Highway 15 is a brute in a small package. Built with the same heavy duty internal components as those used in our Highway 22 panel, it can easily handle the basic power requirements of any vehicle. Its size makes it the perfect power center for roadsters, T-Buckets, kit cars, race cars or any other vehicle where basic operational circuits are required.

Features include:

- 1 A built-in LED flasher to support LED or incandscnt turn signals without the need to purchase an additional item.
- 2 A back up light feed and power wires to make the harness easier to install in a more modern vehicle.
- 3 175 amp mega fuse kit for panel protection.
- 4 Gauge cluster disconnect wiring allows instrument cluster wiring to be built outside of the vehicle.
- 5 Ignition switch with mating connector and 3 additional accessory and ignition terminals. Uses a square GM style key.
- 6 Headlight switch and floor dimmer switch.
- 7 G-10 composite panel base and nylon 6/6 panel components with self-locking screw clamp interface.
- 8 Full-color, tabloid-sized, step-by-step instructions. (not pictured.)

Complete Integrated Fuse Box Wiring System

BIG power in a SMALL panel!
The Builder Series represents the next stage in Integrated Fuse Box Wiring. It is the perfect fit for those tight wiring spots in kit cars, roadsters, etc. It incorporates a slim fuse panel with mounting pads and an attached fuse panel cover with an inner label, identifying all circuits by description and fuse rating. All high output circuits incorporate the same superior spring steel reinforced terminals as used in the Highway Series wiring systems, making the Builder Series second to none in durability and reliability.

The Builder 19 wiring system is a favorite of our friends at Kindig-it Design. They've used the Builder 19 in most of their builds including the "Copper Caddy," (pictured above) which was featured on "Bitchin' Rides" season 2.

\$569⁰⁰

Fuse panel dimensions are 6½" L x 3" H x 2" W

510006

The Builder 19 is the perfect under dash choice for tight spots in kit cars, roadsters and coupes. A streamlined footprint hides the same spring steel reinforced terminals used in the Highway Series wiring systems, making the Builder series second to none in durability and reliability. This makes it the ideal underdash solution when space is at a premium in a build that won't be lacking in high-draw accessories.

As with all of our customizable kits, extra-long leads are provided to make hiding the engine compartment and rear body wiring simple.

Features include:

- 1 Dedicated 6 way power accessory feed plug for quick addition of aftermarket accessories.
- 2 GM style steering column connection. Male connector and terminals are included to allow for easy adaptation of most stock or aftermarket columns.
- 3 Ignition switch with mating connector and 3 additional accessory and ignition terminals. Uses a square GM style key.
- 4 Headlight switch and floor dimmer switch.
- 5 Integrated horn relay wiring and three pin relay.
- 6 Indexed headlight switch connection.
- 7 GM color-coded GXL wire with easy-to-read labeling every 3 to 4 inches.
- 8 Our high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides fuse protection for the panel and charging system. Kit utilizes 6 gauge wire and two 175 amp mega fuses.
- 9 Heat and air conditioning lead wires, as well as accessory radio and battery clock leads.
- 10 Complete installation instructions. (not pictured.)

ACCESSORIES on page 13

POWER Complete Integrated Fuse Box Wiring System PLUS

Pre-Wired • Economical

The Power Plus Series represents a complete deluxe integrated fuse box wiring system utilizing a complete factory style pre-wired fuse box. Power Plus Series wiring kits are designed to offer an economical and convenient wiring solution.

By eliminating the disconnects and sub-harness assemblies and implementing direct run technology to the switches, fuse panel, and end locations, these kits offer a more streamlined installation and less work for you! The Power Plus 13 and 20 include a new headlight and floor-mounted dimmer switch at no extra charge to give you a complete wiring system.

Power Plus Makes Wiring Easy

- Headlight and floor dimmer switches included
- Factory crimp terminations for a perfect fit
- Perfect for under dash mounted projects
- Pre-wired fuse box saves you time
- Complimentary tech support
- Simplified installation
- Detailed instructions
- GM ATO fuse box

10

\$389⁰⁰

Power Plus 13 systems are best suited for under dash installation on the left side of the vehicle.
Fuse panel dimensions are 4 1/4" W x 4 1/4" L x 3" H

510004

The Power Plus 13 is a complete, integrated wiring system incorporating a factory style pre-wired fuse box. Power Plus kits are designed to offer an economical and convenient wiring solution by eliminating disconnects and sub-harness assemblies in favor of direct run feeds to switches and the fuse panel. These kits offer a more streamlined installation and less work for you!

This is an entry level harness designed for a vehicle requiring only basic electrical connections. This system will provide the standard feeds needed to get your project up and running, along with several spare circuits for items like heat, radio, AC and an electric fan. More complex builds might warrant a Power Plus 20 or Highway 22 or 15 panel.

Features include:

- 1 GM style steering column connection. Male connector and terminals are included to allow for easy adaptation of most stock or aftermarket columns.
- 2 Headlight switch and floor dimmer switch.
- 3 Integrated horn relay wiring and three pin relay.
- 4 Indexed headlight switch connection.
- 5 GM color-coded GXL wire with easy-to-read labeling every 3 to 4 inches. Engine wiring includes feeds for the coil, oil pressure sender, water temperature sender, starter, alternator and distributor. Front lighting includes extra-long leads that can be routed for stock or custom appearances. Headlight connectors and terminals are included.
- 6 Rear body lighting accommodates turn signal, license light, and brake lights with long length wires that allow for original or custom routing.
- 7 Our high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides fuse protection for the panel and charging system. Kit utilizes 6 gauge wire and two 175 amp mega fuses.
- 8 Heat and air conditioning lead wires, as well as accessory radio and battery clock leads.
- 9 Complete installation instructions. (not pictured.)

510564

The Severe Duty Universal wiring kit is a capable, weatherproof electrical system designed for use in rugged environments. It features a compact, fully sealed 22 circuit fuse box with electronic flasher and 35 amp relay. The fuse panel is protected by a sealed, manually resettable 200 amp circuit breaker for maximum reliability in harsh outdoor environments.

Features include:

- 1 A fully sealed 22 circuit fuse box with circuitry that is proprietary to American Autowire.
- 2 Electronic Flasher for use with LED or incandescent turn signal bulbs.
- 3 A sealed 200 amp manually resettable circuit breaker offers complete system protection, as well as the ability to shut off power to the system in the event repairs are necessary.
- 4 Main harness comes pre-terminated at one end with sealed connectors. Over 200 inches of tough, heat resistant GXL wire with the primary function printed every 3 to 4 inches for easy installation. Subkits for connecting turn signals, headlights, tail lights, parking lights, brake lights, gauges, third brake light, license plate light, and basic engine functions and sensors included.
- 5 Accessory kit includes a sealed connector that plugs into the fuse box in the optional outlet. It includes seals and terminals with 400 inches of 18, 16, 14, and 12 gauge wire in different colors for all of your additional power requirements.
- 6 Power harness for starting and charging systems is also pre-terminated at one end with sealed connectors and over 100 inches of wire.
- 7 Instrument cluster wiring is designed with a "cluster harness disconnect" system for easy service and assembly.
- 8 Engine wiring includes feeds for coil, tach, water temperature, oil pressure, electric choke, transfer case warning lamp, under hood lamp, transmission kickdown, and electric speedometer.
- 9 A 30 amp headlight switch and dimmer switch are included. Connections for these switches come pre-terminated to make installation faster.
- 10 Front lighting includes extra long leads. All head light, parking light, directional light, and side marker light leads, along with horn.

Fuse panel dimensions are 5 1/2" L x 6" L x 3 1/8" H

Severe Duty Relay Panel

Details
510599

The Severe Duty Relay Panel is a weatherproof system designed for driving all of your power accessories in rugged environments. The panel features compact, fully sealed enclosure that houses eight 35 amp ground triggered relays.

.....499.00 kit

The Kit Includes:

- An all new fully-sealed relay box rated to 180 amps of total output for all of your power accessories.
- Features eight 35 amp relays each protected by 30 amp fuses.
- Five fully sealed connectors. Two for input power, and three for output circuits.
- Eight normally open, ground activated, circuits. There are also six normally closed, ground activated, circuits available.
- Plenty of tough GXL wire in assorted colors and sizes (18ga-10ga) to keep all of your circuits easily identifiable.
- Includes all the terminals, seals, and cavity plugs for unused circuits to keep your connections weatherproof.

500666
22 Port Bulkhead Connector Kit
Requires 2" hole. Weather-tight connection. Seals and terminals included. Accepts up to 12 gauge wire.

.....49.00 kit

510602
60 Amp Weatherproof Relay Kit
Includes terminals, insulation boot and two slow-blow 60 amp fuses with a pre-terminated weatherproof connector.

.....78.00 kit

510598
200 Amp Weatherproof Circuit Breaker
Manually re-settable. Terminals & heat shrink included.

.....52.00 kit

510609
Metri-Pack & Weather-Pack Crimp Tool

Crimps both metri-pack and weather-pack terminals. Used with 12-18 gauge wire.

Fuse panel dimensions are 3 1/4" L x 3" W x 3/4" H

The Route 9 is the newest addition to our growing line of wiring designed for builders requiring basic electrical functionality. Taking design cues from our Highway 22 and Highway 15 systems, American Autowire has developed an entry-level kit that provides a complete vehicle electrical solution in a compact, "bulletproof" package.

This is the perfect wiring harness for hot rods, rat rods, or any vehicle requiring a basic yet fully-functional electrical system. More complex builds may warrant a Power Plus 13 or Highway or 15 panel.

Features include:

- 1 Compact, ATO-Style fuse panel with battery, ignition and accessory power busses. Main power to the fuse panel and power output from the alternator are supplied through a heavy gauge feed with fusible link protection.
- 2 GM color-coded GXL wire with easy-to-read labeling every 3 to 4 inches.
- 3 Combination turn signal/hazard flasher mounted on the panel. Supports LED lighting for front and rear directional lights and dash turn signal indicator lights.
- 4 Horn relay mounted inline on the harness.
- 5 Steering column wiring supports factory or aftermarket columns. Connector kit available separately if required.
- 6 Instrument cluster wiring is included for oil, water and fuel gauges. Tachometer and voltmeter feeds are also provided, along with wiring for directional and high beam indicators.
- 7 Engine wiring includes feeds for the coil, oil pressure sender, water temperature sender, starter, alternator and distributor. Front lighting includes extra-long leads that can be routed for stock or custom appearances. Headlight connectors and terminals are included.
- 8 Rear body lighting accommodates turn signal, license light, and brake lights with long length wires that allow for original or custom routing.
- 9 Sender lead wires are provided for electric fuel tank sending units.
- 10 Complete installation instructions. (not pictured.)

Battery Trunk Mount Kits

All of the trunk mount kits come with both a positive (red) cable and a negative (black) cable. The positive and negative cable are 18' long and are made from 1 ga. wire. Each style head has its own protective covers which are also color coded. With each kit, you also receive the proper battery ends (lugs) as well as a crimping tool to make your battery cable connections as professional as possible.

Complete & Updated
wiring systems
for specific year
model vehicles

The Classic Update Series is a complete kit in a box!

Classic Update complete wiring kits are made for the automotive enthusiast who wants some modern amenities in their classic vehicle. These kits include everything you need to modernize your classic vehicle: Headlight, Dimmer, and Ignition switches (in most cases); Boots, Tubes, and Grommets; Fuses, Relays, and Flashers; Original Connectors, Terminals, and Disconnects. Classic Update wiring systems are made for specific make/model/year vehicles and are currently available in 62 kits!

* These kits are designed for MODIFIED original vehicles, not OEM restoration projects.

What's missing from
"The Competition"?

Switches • Headlight • Dimmer • Ignition • Boots
Tubes • Grommets • Fuses • Relays • Flashers

Original Connectors • Terminals • Disconnects

CLASSIC UPDATE SERIES

\$749⁰⁰

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications.

- 1 Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- 2 Pre-built dash harness and our exclusive gauge cluster disconnect system for use with stock or aftermarket instruments.
- 3 Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations. Original-style bulkhead connectors included.
- 4 Six-way power accessory plug can be used as a convenient power source for aftermarket accessories.
- 5 Rear body wiring with extra-long leads allows for custom routing.
- 6 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- 7 Original-replacement connectors, terminals and lamp sockets.
- 8 Steering column adapter kit can be used to mate with stock or aftermarket columns.
- 9 Headlight switch with 26 amp internal circuit breaker and new floor dimmer switch included.
- 10 Correct original tube and grommet assemblies for factory lighting connections.
- 11 Replacement ignition switch that is compatible with HEI and EFI swaps.
- 12 Fuse panel mounting bracket and required hardware.

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications. This Fullsize kit will support Bel Air, Biscayne and Impala models.

- 1 Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- 2 Pre-built dash harness and our exclusive gauge cluster disconnect system for use with stock or aftermarket instruments.
- 3 Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations. Original-style bulkhead connectors included.
- 4 Six-way power accessory plug can be used as a convenient power source for aftermarket accessories.
- 5 Rear body wiring with extra-long leads allows for custom routing.
- 6 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- 7 Original-replacement connectors, terminals and lamp sockets.
- 8 Headlight switch with 26 amp internal circuit breaker and new floor dimmer switch included.
- 9 Dash harness includes a connector for the 69+ GM steering column connector. A mating connector and terminals are included for easy adaption to popular late model columns.
- 10 Replacement ignition switch with lock cylinder & key that is compatible with HEI and EFI swaps. Connectors supplied for 1966-68 switches, but 1968 applications must reuse original ignition switch.

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications.

- 1 Updated ATC fuse panel and fuses and mounting bracket, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- 2 Pre-built dash harness and our exclusive gauge cluster disconnect system for use with stock or aftermarket instruments.
- 3 Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations.
- 4 Six-way power accessory plug can be used as a convenient power source for aftermarket accessories.
- 5 Rear body wiring with extra-long leads allows for custom routing.
- 6 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- 7 Built-in headlight, fog light and horn relays.
- 8 Original-replacement connectors, terminals and lamp sockets.
- 9 Steering column adapter kit can be used to mate with stock or aftermarket columns.
- 10 Headlight switch with 26 amp internal circuit breaker and new floor dimmer switch included.
- 11 Replacement ignition switch that is compatible with HEI and EFI swaps.

87 - 89 Ford Mustang

\$1,269⁰⁰

510547

Our 1987-89 Mustang Classic Update kit has been designed to eliminate much of the clutter of the original Ford wiring, and is the ideal solution for a street/strip build with aftermarket fuel injection or a late model engine swap. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items while reducing the overall complexity of the later Foxbody chassis harness.

- ① Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches. Custom fuse panel mounting bracket included.
- ② Pre-built dash harness and our exclusive gauge cluster disconnect system for use with aftermarket instrument clusters. Original cluster wiring is not supplied.
- ③ Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations.
- ④ Pre-built rear body wiring with quick disconnect.
- ⑤ Pre-built front light connections with quick disconnects.
- ⑥ 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- ⑦ Built-in horn relay and flashers.
- ⑧ Plug and play turn signal, ignition, wiper and high beam switch connectors.
- ⑨ Dash harness is pre-wired to support a factory HVAC control head. Some connectors must be salvaged from an original harness for full operation.
- ⑩ New door jamb switches included.

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications.

- 1 Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- 2 Pre-built dash harness and our exclusive gauge cluster disconnect system for use with stock or aftermarket instruments.
- 3 Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations.
- 4 Six-way power accessory plug can be used as a convenient power source for aftermarket accessories. Dash light candelabra makes for simple inclusion of auxiliary gauges.
- 5 Rear body wiring with extra-long leads allows for custom routing.
- 6 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- 7 Built-in headlight, fog light and horn relays.
- 8 Original-replacement connectors, terminals and lamp sockets.
- 9 Steering column adapter kit can be used to mate with stock or aftermarket columns.
- 10 Dash candelabra provides a convenient 12 volt source for any add-on gauge lighting.

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications.

- ① Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- ② Pre-built dash harness and our exclusive gauge cluster disconnect system for use with stock or aftermarket instruments.
- ③ Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations.
- ④ Six-way power accessory plug can be used as a convenient power source for aftermarket accessories. Dash light candelabra makes for simple inclusion of auxiliary gauges.
- ⑤ Rear body wiring with extra-long leads allows for custom routing. Factory pass through grommet included.
- ⑥ 175 amp mega fuse kit with 6 gauge charge cable to support a high output charging system and internally regulated alternator.
- ⑦ Built-in headlight, fog light and horn relays.
- ⑧ Original-replacement connectors, terminals and lamp sockets.
- ⑨ Steering column adapter kit can be used to mate with stock or aftermarket columns.
- ⑩ Headlight switch with 26 amp internal circuit breaker and new floor dimmer switch included.

AAW offers a full vehicle grounding kit, P/N 500717, for customers building a fiberglass bodied vehicle or one requiring extra grounding capabilities. Contact AAW or your favorite AAW dealer for pricing.

FOR OUR
CAMARO AND NOVA VOLTMETERS

American Autowire is pleased to introduce the perfect complements for our 510105 Classic Update for the 1970-72 Chevelle, and 510333/510089 Classic Updates for the 1967-72 Chevy Trucks—

Replacement voltmeters!

Our Classic Update and universal kits do not support use of an original or aftermarket ammeter due to safety concerns* when combined with the modern charging system and high amp alternators frequently used as part of a wiring upgrade. Our voltmeters are a quick swap for the original gauge, and a simple install with any of the above Classic Updates.

Our 1968 - 69 Camaro (p/n 510121) and 1968-74 Nova (p/n 510122) Voltmeters are also still available, and can be found in our Street Rod catalog.

All gauges are available now!

- ⑨ Steering column adapter kit can be used to mate with stock or aftermarket columns.
- ⑩ Headlight switch with 26 amp internal circuit breaker and new floor dimmer switch included.

62 - 74 Volkswagen Beetle

\$549⁰⁰

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit is designed to include all the basics needed to rewire a vehicle from headlight to tail light, and in the case of our Volkswagen Beetle kit, is designed only for vehicles using a 12 volt electrical system.

- 1 Updated ATC fuse panel and fuses, along with modern GXL wire throughout. Wire functions are labeled every 3 to 5 inches.
- 2 Engine and front light harness with extra-long leads for custom routing and updated engine and transmission combinations.
- 3 Battery and ignition junction blocks for easy power distribution.
- 4 Rear body wiring with extra-long leads allows for custom routing.
- 5 System power supplied by a heavy gauge fusible link feed.
- 6 Diodes and complete instructions to support a factory single bulb dash turn signal indicator light.
- 7 Original-style terminals to complete connections to required switches and light assemblies.
- 8 LED turn signal flasher.
- 9 Electric fuel tank sender lead wires.
- 10 Steering column connection for the original VW switch, and maintains dimmer and "flash to pass" functions.

COMING SOON

Our new line of banked relays are under development and will be available soon.

Check back soon for more details!

Turn Signal Switch Adapters

American Autowire Classic Update kits use the later style 1969+ General Motors steering column connector. This requires the original connector on the steering column side (attached to the turn signal switch wiring) to be cut off and replaced with the supplied mating part to match the new AAW dash.

Our turn signal switch adapters will mate an original GM turn signal switch to an American Autowire Classic Update dash, eliminating the need to cut off the connector or crimp new terminals.

510800
1967-1972 GM truck stock column to AAW dash.

1963-66 GM stock column to AAW dash
8 pin double stack connector
..... **42.00 ea**

Air Conditioning Harnesses

If you wish to retain your factory air conditioning with a Classic Update, but your original harness is not serviceable, we may have a solution in an original-replacement Factory Fit harness or vehicle specific add-on part. The part numbers below can be used with a Classic Update kit to provide power to factory original AC controls and underhood components. Please note they may not be required with an aftermarket AC system, because all Classic Updates include a power feed for aftermarket AC by default.

Severe Duty Relay Panel

The Severe Duty Relay Panel is a weatherproof system designed for driving all of your power accessories in rugged environments. The panel features a compact fully sealed enclosure that houses eight 35 amp ground triggered relays.

.....**499.00 kit**

The kit includes:

- A fully-sealed relay box rated to 180 amps of total output for all of your power accessories.
- Five fully sealed connectors. Two for input power, and three for output circuits.
- Eight normally open, ground activated, circuits. There are also six normally closed, ground activated, circuits available.
- Plenty of tough GXL wire in assorted colors and sizes (18ga-10ga) to keep all of your circuits easily identifiable.
- Includes all the terminals, seals, and cavity plugs for unused circuits to keep your connections sealed.

500239

Anti-Theft Relay Kit

This relay kit disables the starter cranking circuit until a predetermined switch is activated.

American Autowire is proud to bring you our custom battery cable sets! Battery cables are a critical part of your vehicle's charging system, so don't let an old, corroded set stand in the way of maximum performance in your project.

Our custom battery kits are made using 1 gauge cable, and top post kits feature molded ends with steel ring inserts for extra durability. Both trunk and under hood kits include positive and negative cables, a star crimp tool, cable lugs and shrink tubing. Top post sets also include a 36 inch, 10 gauge secondary lead on the negative cable.

Please note: Boots are not sold separately and cables are only available as a set.

Exclusive crimping tool that can give your battery cable's crimps as much as 600 lb. pull strength before soldering

Battery Trunk Mount Kits

All the trunk mount kits come with both a positive (red) cable and negative (black) cable. Each set features two 18 foot cables, and includes the proper battery cable ends (lugs) as well as a crimping tool to make your battery cable connections as professional as possible.

**500723
Top Post**

..... **160.00 set**

Battery Under Hood Mount Kits

All under hood mount kits come with both a positive (red) cable and a negative (black) cable. Cables are 6' long and are made with the same 1 gauge wire as trunk mount kits. Each top post head has its own protective, color-coded cover. All kits include the proper battery ends (lugs) and a crimping tool to give your battery cables a professional crimp every time!

**500725

w/ cables, lugs, crimping tool
..... **114.00 set**

The Lifeline enables those using a master disconnect switch to retain a small amount of power for memory circuits common in fuel injection computers, radio presets, and clocks. The Lifeline is "self-resetting," which eliminates the need to replace a fuse if the user tries to start the vehicle before placing the the master disconnect switch in the "on" position. This clever design allows you to disconnect your battery without losing your memory settings.

For use with switches located on page 111.

500837
Remote Lifeline
To retain memory across Master Disconnect Switch, part number 500834.

510287
11 Volt Module

The 11 Volt System Voltage Sensor is used to monitor the vehicle system voltage and trigger an indicator light in the following situations:
1. Identify total system voltage below 11 volts: The module monitors the existing voltage in the vehicle and will set on an indicator light ground circuit when the system voltage drops below 11 volts. This is especially critical in fuel injection systems where the ECU is expecting full system voltage. Many ECU's will not function properly operating below the 10-11 volt level.
2. Act as a charge indicator light: By identifying system voltage below 11 volts, the indicator light is signaling a problem in the charging system or battery that must be identified. System voltage in the 5 to 11 volt range may be too weak to start the vehicle depending on the power requirements of your vehicle.
The 11 Volt System Voltage Sensor can be used with 12 volt LED indicator lights or 12 volt incandescent indicator lights of 2 amps or less. Almost all dash incandescent indicator lights draw between 0.19 - 0.63 amps with a wattage rating from 2 to 4.9 watts. LED lights draw far less amperage and do not have this restriction.

Intelligent fuses are an innovative automotive fuse that feature an LED indicator that glows when the fuse is blown. With intelligent fuses it is quick and easy to find a blown fuse in a fuse block mounted behind a dimly lit dashboard or under the hood of your car. Intelligent fuses are designed to fit all fuse block configurations offered by American Autowire, and are drop-in replacements for existing OEM and aftermarket automotive ATO/ATC and mini fuse applications.

The intelligent fuses carried by American Autowire meet stringent SAE specifications for operation and material components. Note that the fuses still maintain the circuit test capability for the load and output side of the fuse. This is important when testing an operational circuit. Many other fuses do not retain this function.

Intelligent fuses are available by individual fuse ratings or as complete kits designed around our full wiring kits as follows:

Which alternator do you have?

There are 4 GM alternators commonly installed today; the externally regulated alternator used on most GM vehicles from 1963 to 1974, the "SI" series alternator with internal regulator used on almost all GM vehicles from 1969 to 1985, the CS 130/144 series alternator with internal regulator used on GM vehicles from 1986 until 1999, and finally the CS 130 D (which has an internal cooling fan) from 1994. Check yours against the pictures so you can order the correct connectors.

1963-1974 External Regulator

1969-1985 "SI"

**1986-1999
"CS130"
"CS144"**

1994-Beyond "CS130-D"

The newest alternator to appear on GM vehicles has a new plug but the most noticeable difference is that the fan is now located inside the alternator body.

Alternator Conversion Kits

Each kit includes the correct pre-assembled pigtail or components required to make your alternator swap quick and easy.

1. 27555

GM External regulator to GM "SI" Series Internal Regulator

Snap-Fit Door Jamb Switch
Power an interior lighting system or trigger a relay. Two bullet terminals. Requires .80" to .85" mounting hole.
..... **12.00 ea**

500102
Easy Screw-Mount Door Jamb Switch
Built-in mounting plate. Two ring terminals. Requires 3/4" diameter hole.
..... **11.00 ea**

500081
Courtesy Light Connection Kit
Uses standard 631 bulb.
..... **30.00 ea**

510197
Courtesy Light Delay Module
Adjustment knob allows delay time selection from 0 to 60 seconds. Includes mounting bracket and full instructions.
..... **80.00 ea**

500148
Toggle Turn Signal Switch Kit
Complete w/ .25 female terminals, connectors and instructions. Controls turn signals and brake circuit. Requires 7/8" hole.
..... **47.00 ea**

500042
Dimmer Switch
3 contact, .25" blade connection.
..... **10.00 ea**

500286
Connector & Terminals
Connector and terminals for 500042
..... **6.00 ea**

500144
Heater Switch
Push/Pull type switch with OFF-LO-HI positions. Built-in resistor. Accepts 10-24 threaded knob. Requires 7/16" hole.
..... **33.00 ea**

500151
Momentary Start Switch
Push button start switch that accepts ring terminals.
..... **12.00 ea**

500146
Wiper Switch
2 speed with 'Park' position. Uses .250" female terminals. Accepts 3/16" shaft knob. Requires 7/16" hole.
..... **21.00 ea**

500322
Push/Pull Switch
ON/OFF switch that accepts ring terminals. Comes complete with chrome, fixed, knob.
..... **28.00 ea**

500147
Glove Box/Console Light Assembly
Assembly come with socket, bulb, wire and full instructions. Switch mounts in a 5/8" hole. Need 12 volt power source and good ground.

Hyper LED OEM Style Replacement Bulbs

- Up to 3x Brighter than stock bulbs • Less Power Used
- Doesn't Get Hot • More LEDs per bulb!

For the first time ever, a replacement bulb that will last as long as your car. Get the great look and color available from LEDs in your stock taillight sockets with these replacement 1157 and 1156 bodied bulb assemblies. Each bulb works as the original bulb did, but utilizes the newest technology available. Both decorative and utilitarian, LEDs use less energy and have that "instant on" everyone loves. Get your set today!

Use red in the taillights, use the whites for very bright back-ups and interior lighting, use amber for turn lamps and marker bulbs.

510139
Back Up Light Connection Kit
for TKO transmission.
.....**13.00 ea**

Our professional grade replacement terminal and connector sets are available in both Weather Pack and 56-Series Delphi varieties. The standard 250 piece kit Delphi style kit makes for a great accessory as part of a Classic Update installation, and the Weather Pack version is handy for use with a Severe Duty weatherproof system or when adding a circuit that will be exposed to the elements.

We've included the most common terminals and connectors that will help you with troubleshooting, repairing, or replacing connections. All contents are compartmentalized in a durable case with a heavy duty latching tab. The inside of the lid has a diagram detailing the contents by image and description. Great to keep in the car, in the garage, or both!

Weather-Pack Terminal & Connector Kit includes:

- (1) Terminal removal tool
- (4) 1-Way female/male Connector Sets
- (6) 2-way female/male Connector Sets
- (4) 3-way female/male Connector Sets
- (4) 4-way female/male Connector Sets
- (3) 6-way female/male Connector Sets
- (130) 14-16 ga. green seal
- (50) 12 ga. blue seal
- (25) Cavity plugs
- (25) 12 ga. male terminal
- (25) 12 ga. female terminal
- (65) 14-16 ga. male terminal
- (65) 14-16 ga. female terminal
- (1) 9"x14" heavy duty case

Terminal & Connector Kit includes:

- (25) Each 56 Series female/male terminals, 14-16 ga
- (10) Each 56 Series female/male terminals, Single 12 ga
- (10) Each 56 Series female/male, double terminals, 14-16 ga
- (10) 59 Series Terminal (female), Double 14-16 ga
- (10) 59 Series Terminal (female), Single 14-16 ga
- (10) Each Pack-Con Terminal female/male, Single 18-20 ga
- (10) S10 Ring Terminal, Single 18-20 ga
- (10) M5 Ring Terminal (large), Single 14-16 ga
- (10) M5 Ring Terminal (small), Single 14-16 ga
- (10) M6.3 Ring Terminal, Single 14-16 ga
- (20) Rivet Terminal, Single 16-18 ga
- (15) Rubber Sleeve, 7/64 x 3/4
- (15) Rubber Sleeve, 5/32 x 7/8
- (1) 8-Way Connector Set female/male
- (1) 6-Way Connector Set female/male
- (1) 4-Way Connector Set female/male
- (2) Triple Connector Sets female/male
- (3) Double Connector Sets female/male
- (5) Single Connector Sets female/male
- (4) 3-Way Connector (female), Headlight
- (4) 2-Way Connector (female), Headlight
- (2) 3 7/8" Connector Sets female/male Turn Signal/Steering Column
- (1) Pocket Screwdriver/Terminal Pick
- (1) 9"x14" Heavy Duty Case

Single & Double Crimp Tools

With these two OEM type tools in your arsenal you'll be the envy of all the professional installers around you. Using the Single Crimp tool, you can crimp any of the OEM F-crimp terminals on wire sizes from 20-14 ga. Double Crimp Tool allows you to crimp double F-Type terminals with wire sizes range from 10 to 18 gauge. In most cases, having these two tools will allow you to finish every crimp required for installation for a new chassis wiring harness without hassle and provide professional grade crimps every time.

You Tube Video Tutorial

If you are buying, or even if you already own, one of these crimping tools, be sure to check out our video tutorial, "Crimp Tool Video" on our YouTube channel.

Tech Support Rep, Craig Darpino walks you through correctly utilizing the single (510585) and double (510586) crimpers that are highly recommended for the terminals in our wiring kits. He shows you which tool is right for each application, how to use the crimper, and provides examples of both correct and incorrect crimps.

Tool Rental Program

Our rental program is designed for customers who are purchasing any harness that includes a bag of loose terminals (Classic Update, Power Plus, Builder, and Highway Series). We supply these very unique and special crimpers to help you with the installation of your American Autowire wiring harness. Our factory style GM terminals supplied in your kit are designed to be crimped by these tools only.

For more information on this program:
Go to www.americanautowire.com. Under the products tab, click on the "crimping tools" link.
Or call 1-888-929-4738 to speak to a Sales Technician.

500517
Battery & Alternator Voltage Tester
Testing circuits and tracing power can be tricky. One of the "must-have" tools in every tool box is a voltage tester. No matter where you go or what you do, a simple voltage tester can make any troubleshooting job a little easier. The clip is serrated and comes with its own insulated boot to make it easy to isolate.

Split Braid Wiring Harness Wrapping

Our unique, solid black, split braid tubing is the ideal finishing touch to protect and organize all your wiring harnesses. Technical features include:

1. Cut and abrasion resistant.
2. 25% split edge overlap for bundle size versatility.
Allows coverage around inline plugs, connectors, and splices.
3. -94° F to 257° F operating range. High melting point at 482° F.
4. Tight radius bending without splitting open.
5. Allows wire removal without disassembly.
6. No need for additional fasteners.
7. Cuts with heat gun to seal edges.

California Proposition 65

California's Proposition 65 requires that a clear and visible warning be provided to consumers in California that have the potential to expose them to various substances which may cause cancer, birth defects or other reproductive harm. American Autowire cares about your safety and hopes that you take steps toward protecting yourself.

Many American Autowire products are manufactured from Copper, Plastics and an assortment of other standard materials. These materials are manufactured with a variety of substances, including lead and di(2-ethylhexyl)phthalate in some cases. To reduce your potential exposure, we recommend that your hands are cleaned after handling any products built of similar materials, whether this is an American Autowire product or any other brand. Additionally, no American Autowire products are suitable for ingestion in any way.

In compliance with California Proposition 65, we are providing the following warning concerning all American Autowire products:

WARRANTY

American Autowire Inc. warrants the enclosed product from manufacturing defects and will repair or replace the enclosed product in the event of a manufacturing defect for a period of one year from the date of original purchase at our discretion. An RMA (Return Material Authorization) is required before any product will be accepted for repair or replacement under this warranty. Returns will not be accepted without the RMA number on the outside of the box. This warranty applies to the original purchaser and is not transferable. This warranty does not cover postage, freight, or delivery fees for sending the harness to and from our service facility. A purchase receipt or other proof of date of original purchase will be required before service can be rendered. This warranty covers normal consumer use, and does not cover damage which occurs in shipment or failure which results from alteration, accident, misuse, abuse, neglect, improper installation or improper care and maintenance. Under any circumstance, the liability of the manufacturer shall be limited to the original cost of the product paid, and the manufacturer shall not be liable for any consequential or incidental damages which may occur as a result of the use of any of our products. This limit on liability may vary in your state, and may have additional rights and/or remedies depending on the state in which you live.

MISSING PARTS

A complete list of kit components is provided in every American Autowire kit. While every effort is made to ensure that no components are missing prior to shipping, it is the sole responsibility of the customer to inspect the package contents and report any missing components within 30 days of receipt. American Autowire does record the shipping weight of each item shipped and reserves the right to refer to this record in the event that a customer indicates components are missing after 30 days of receipt. American Autowire will only take responsibility for missing items shipped directly from our facility to the end user within 30 days of receipt. If you are missing a component from an item purchased from a vendor, supplier, re-seller or other means you must contact the company or individual you purchased it from directly to seek assistance.
