A

1. Plug the bare terminal end of 510960 power top switch harness (red wires) into the accessory connector on the 510646 dash harness as shown above maintaining color continuity with red wire in that location.
2. Plug one end of the 510960 power top harness (purple and gray wires) into the motor connection behind the back seat, and plug the other end into the power top switch harness included with this kit as shown above.
NOTE: If you have power door locks, or any other battery powered circuit, use the red pigtail on the power top switch harness to plug your feed into.
3. Clip off the first section of the enclosed 30 amp circuit breaker "A" as shown above, remove the 30 amp fuse from "BAT2" location on the fusebox, and replace it with the 30 amp circuit breaker. Your power top installation is now complete.
