

POSITIVE BATTERY CABLE

1991-1995 JEEP YJ, 2.5L & 4.0L

www.americanautowire.com 856-933-0801

FEATURES:

1. AWE 4 gauge primary and secondary cables.
2. Primary and secondary wire cables are constructed of SGX (Cross Link Polyetherhylene) providing added wear resistance and load protection.
3. Correct factory two-bolt terminal connection to the power distribution fuse box.
4. Unique battery connection bolt that allows for high draw accessories to be bolted directly to the battery. This prevents overtightening and damage to the battery terminal.
