

POSITIVE BATTERY CABLE

1987-1990 JEEP YJ, 2.5L & 4.2L

Unique battery connection bolt that allows for high draw accessories to be directly bolted to the battery.

www.americanautowire.com 856-933-0801

FEATURES:

1. AWE 4 gauge primary starter motor connection.
2. AWE 4 gauge secondary starter relay connection.
3. Primary and secondary wire cables are constructed of SGX (Cross Link Polyetherhylene) providing added wear resistance and load protection.
4. Unique battery connection bolt that allows for high draw accessories to be bolted directly to the battery. This prevents overtightening and damage to the battery terminal.
